A Reminder of Liability Information for COVID-19 Vaccination Sent to German Physicians

Letter

More

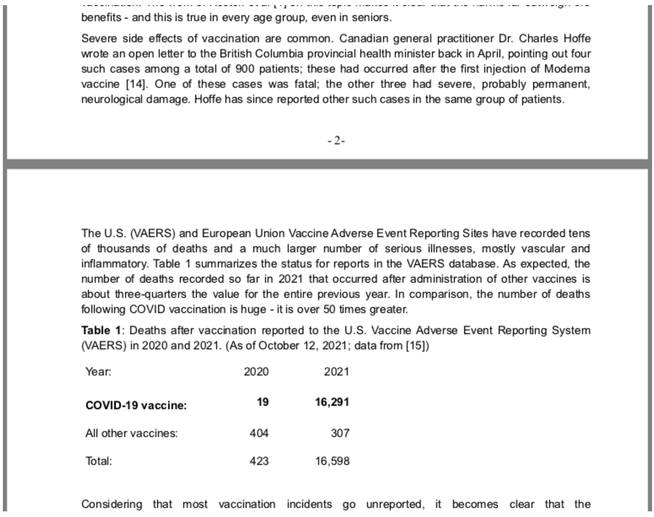
In June 2021, a Notice-of-Liability letter was sent to physicians in Germany. This reminder letter includes the recent findings and results that further strengthen the conclusion that the gene-based COVID vaccines are unnecessary, ineffective, and dangerous, as stated in the June letter.

> "We would also like to ask you, beyond the legal level, that you, as physicians and also human beings, once again thoroughly examine whether you can reconcile your attitude and your medical practice with your conscience. **Our first principle is that we must do no harm.**"

> In a major development which could have far-reaching consequences, **a Hasidic rabbinical court in New York ruled on November 1 that it is 'absolutely forbidden to administer the mRNA Covid-19 vaccine to children, adolescents, young men and women. "** The judges ruled that mandatory Covid-19 vaccines transgress Jewish law, which means it could be anti-Semitic to enforce it on religious Jews who have no wish to take it. Given that the rabbinical courts in Israel are part of the formal legal system, further decrees forbidding mandatory Covid-19 vaccines might have the power to dissolve the infamous green pass system.

Special thanks to Mascha Orel and her team for the excellent translation.

The English translation of the reminder is below.



benefits - and this is true in every age group, even in seniors.

Severe side effects of vaccination are common. Canadian general practitioner Dr. Charles Hoffe wrote an open letter to the British Columbia provincial health minister back in April, pointing out four such cases among a total of 900 patients; these had occurred after the first injection of Moderna vaccine [14]. One of these cases was fatal; the other three had severe, probably permanent, neurological damage. Hoffe has since reported other such cases in the same group of patients.

- 2-

The U.S. (VAERS) and European Union Vaccine Adverse Event Reporting Sites have recorded tens of thousands of deaths and a much larger number of serious illnesses, mostly vascular and inflammatory. Table 1 summarizes the status for reports in the VAERS database. As expected, the number of deaths recorded so far in 2021 that occurred after administration of other vaccines is about three-quarters the value for the entire previous year. In comparison, the number of deaths following COVID vaccination is huge - it is over 50 times greater.

Table 1: Deaths after vaccination reported to the U.S. Vaccine Adverse Event Reporting System (VAERS) in 2020 and 2021. (As of October 12, 2021; data from [15])

Year:	2020	2021
COVID-19 vaccine:	**19**	**16,291**
All other vaccines:	404	307
Total:	423	16,598

Considering that most vaccination incidents go unreported, it becomes clear that the
